Executive Summary — August 2026: Growth is healthy, but concentrated and slightly behind plan

1 · Five metrics that matter most

- Deposits vs plan (-0.9%): the top-line scorecard; gap narrowed from -$230M in July
- Net new money (+$165M): true growth excluding interest; shows franchise strength
- Renewal rate (81.5% vs 83%): cheapest funding; each point ≈ $10M/month at stake
- Rate position vs peers: Broker 7th of 10 is the root cause of Broker softness
- Top-3 broker share (41%) + 90-day maturities ($2.9B): the funding-risk pair

2 · What happened in August

- Deposits +$200M to $12.60B; NNM rebounded to +$165M from +$25M in July
- Oaken (+$105M NNM, +3.0% MoM) beat plan by 2%, aided by the Aug 12 tiered savings offer
- Broker returned to growth (+$60M) after a -$63M July, but is 2.3% below plan; renewals 79%
- Complaints +22% to 148 and STP fell to 71% as the new KYC vendor ramped up
- 12-month retention slipped 10 bps/month to 90.4%

3 · Three key risks

- Broker concentration: top 3 firms = 41% (limit 40%); largest at 18%
- Renewal / refinancing: $2.9B GIC matures in 90 days; renewals at 81.5% mean ~$540M must be replaced
- Service erosion: STP and complaint trends, if not fixed, will hit Oaken retention and brand

4 · Three opportunities

- Scale Oaken tiered savings: +$62M in 3 weeks, cheap core funding at 31.7% savings mix
- Target Broker 1-3Y GIC pricing (rank 7th → 4th) for ~$250M incremental NNM
- Cross-sell: lifting products/customer from 1.42 to 1.5 adds ≈ $300M+ balances

5 · Priorities for September

- Approve capped +10 bps broker GIC action ($250M, 6 weeks, ≈$0.25M annual cost)
- Fund $1.2M STP fix; restore STP ≥ 75% and complaints ≤ 120 by November
- Launch retention outreach on $950M maturing in September; target 84% renewal
- Adopt broker guardrails: top-1 ≤ 15%, top-3 ≤ 35% within 12 months

Bottom line: Franchise momentum is strong (+9.8% YoY), but growth quality (renewals, broker dependence, service) needs attention to close the -$120M plan gap and protect margin.
